OUR FLAG! SYMBOL OF OUR NATION, our years of freedom as a united and independent nation. In its broad folds lies the life blood of a million Americans who have died defending it. So little has been required of us in payment for such a priceless heritage, when we consider the sacrifice our forefathers have made for it.

At this time when our way of living has been threatened, we value our democracy more than we did in our thoughtless years. And so we feel it fitting that we should dedicate this year's annual to the American flag.

On July 4, 1912, the states of Arizona and New Mexico were admitted to the Union, and Congress authorized the present day flag having thirteen alternate red and white stripes, and forty-eight white stars on a blue field. Red stands for valor, white for purity, and blue for peace, and it is to these ideals that we dedicate our book.

IN 1776, GENERAL GEORGE WASHINGTON unfurled the first unofficial emblem of American independence, the "Union Jack," a flag which was used until 1777, when the Continental Congress authorized the "Stars and Stripes" as our first official banner. This flag had thirteen stars arranged in a circle, each star representing one of the thirteen rebelling colonies. Legend has it that General Washington designed this flag, and from his rough sketch Betsy Ross made it, the only alteration being that of using five-pointed stars instead of six-pointed ones.

Sonora Union High School has cooperated in the educational program of Camp Buck Meadows by supplying a teacher for leatherwork, woodwork, welding, blacksmithing, lettering, and sign carving.

April 6, 1933, the C.C.C. was created by Congress — Buck Meadows Camp has been in existence since June, 1933. At present there are approximately 1500 camps. Over two million young men have been given jobs through this organization.

Every three months new enrollees are taken into the C.C.C. to take the place of the men who have left to take jobs or have been discharged. Each new enrollee goes through an orientation program which gives him an idea of how the camp is run and the advantages offered him in camp.

Activities

THE YEAR 1795 SAW THE NUMBER of stars and stripes increased to fifteen each. This flag was used during the War of 1812, and inspired Francis Scott Key's "Star Spangled Banner." Key was a prisoner on a British Man-of-War which was shelling Fort McHenry. All night the bombardment continued, and when the first rays of morning light struck the fort, Key saw the tattered American flag still waving.

In his joy at this sight, he scribbled
his memorable poem on the
back of an envelope.

Future Farmers of America

Vocational Agriculture is taught in rural high schools all over the United States. The classes study Agriculture from government statistics, field trips, and home projects. This is not a college preparatory course, but one to help a boy get started in livestock raising or other useful agricultural work.

The Future Farmer chapter is a part of our local Agriculture department. The Sonora Chapter 193 is one of more than 180 active F. F. A. chapters in California.

The program of the Agriculture department is to train the farm boy to be a better citizen, a prosperous producer, and a patriotic American.

Opportunities are so numerous and activities so varied that here in Sonora High we are trying to follow a simple program of livestock improvement and Ag. Mechanics.

Athletics

On July 4, 1818, Congress voted to return the number of stripes in the flag to thirteen, one stripe for each of the thirteen original colonies, and for every new state entering the Union one new star was to be added. The merchant marine of that day carried the stars arranged so as to form a great five-pointed star, whereas the warships carried them in parallel rows. These types of flags continued to be used up until the Civil War.

School Year

When, In 1865, the Civil War ended with a Northern victory, the flag had the number of stars increased to thirty-six. This flag signified that the United States was once more an unbroken union. This banner waved over the savage Indian wars of the 1870's, and was always on the advancing waves of American civilization. It flew over San Juan Hill, and was a symbol of the United States as a world power.
